SCHOOL OF STATISTICS

University of the Philippines
Magsaysay Ave., Diliman, Quezon City

APPLICATION FOR GRADUATE ADMISSIONS

To the applicant: This application form shall not be acted upon unless the following documents are received by the Office of the Graduate Director, UP School of Statistics, Diliman Quezon City on or before April 30 (First semester)/September 30 (Second semester)

- [ ] Official Transcript of Records (TOR)
- [ ] Three (3) letters of recommendation from a.) former professor b.) employer/immediate superior
- [ ] Photocopy of NSO Birth Certificate (original to be presented)
- [ ] NSO Marriage Certicate (for married women)
- [ ] Three (3) passport size photos
- [ ] TOEFL score report (for foreign applicants who's medium of instruction in the schools they attended is not English)

Name: Cuyugan (Last) Adrian (First) Siaron (Middle/Maiden)

- [x] Male
- [ ] Female

Citizenship: Filipino

Civil Status:

- [x] Single
- [ ] Married
- [ ] Separated
- [ ] Others. Please Specify _____

Contact Numbers: +60 12 3575954 Email address: adrian@foxyreign.com

Mailing Address: New 38 Old 579 First Street. Sto. Nino Marikina City 1800

Permanent Address: same

Date of Birth: April 21, 1985 Place of Birth: Marikina

PROPOSED GRADUATE PROGRAM:

Degree Sought:

- [x] Master of Statistics (M.O.S.)
- [ ] Master of Science (M.S. Statistics)
- [ ] Doctor of Philosophy (Ph.D. Statistics)

Desired Term of Admission:

- [x] First Semester of Academic Year _____
- [ ] Second Semester of Academic Year _____
- [ ] Summer of Academic Year _____

Preferred Area of Concentration

- [ ] Industrial Statistics
- [x] Market Research and Business Intelligence
- [ ] Social Statistics
- [ ] Mathematical Statistics
- [x] Computational Statistics
- [ ] Risk Management and Stochastic Finance

Enrollment Status:

- [ ] Full-time
- [x] Part-time

Financial Source:

- [ ] Fellowship
- [ ] Benefit from Employer
- [x] Personal
- [ ] Others. Please Specify

Will you be Interested to enroll in Makati Campus?

- [ ] Yes
- [x] No

EDUCATION AND TRAINING

List in chronological order all colleges and universities attended for secondary and higher education.

Name of Educational Institution	Location of School	Year		Major field	Degree or Diploma	Year Received or Expected
		Entered	Left			
PSBA	Quezon City	2002	2004	Business Admin	MIS	2004
NCSA	Antipolo City	1998	2002	Highschool		2002

HONORS AND AWARDS:

List in chronological order academic honors, fellowships and scholarships received:

Honors	Institution	Date
Full-time scholarship	PSBA QC	1st Sem 2002
Class Valedictorian	NCSA	2002

EMPLOYMENT HISTORY:

Firm or Organization	Position	Kind of Work	Inclusive Dates
Computer Science Corporation	Data Mining Analyst	Data science	Jan 2011 - present
Logica Philippines	Consultant	IT Service Management	2010
Perimate eSecurity Philippines	HelpDesk Trainer	IT Service Desk	2009 - 2010
ICT Marketing Services	Trainer	Trainer	2007 - 2008
eTelecare Global Solutions	Subject Matter Expert	Trainer	2006 - 2007

PERSONAL STATEMENT:

Describe in approximately 500 words your background, your past work related to statistics, and your plans for graduate study and professional career.

Recently, I have gained interest in data. My current role as a data mining analyst requires intensive knowledge in Statistics. Although my college curriculum includes basic statistics for business, to gain more knowledge in this field, I have taken and earned a few verified online massive online courses co-offered with international universities receiving distinctions in Data Analysis using R Language, practical machine learning, statistical inferences, big datan and business intelligence.

As I deal with small to medium sized data that requires interpretations to find patterns through visualization and statistical testing, Learning the basic and solid foundations of Statistics would be a great help. Also, using different algorithms to understand a very noisy set of data is one of my current daily tasks in which computational statistics would come in.

Earning a degree in Master of Statistics will not just give me a better edge with my current employer, I believe that the emerging data scientists will soon be needed as the data is exponentially created.

After earning my degree in Master of Statistics, I am planning to continue with data mining focusing on predictive analytics and business intelligence.

My short-term goal is to finish this course as fast as possible even if I will still be working full-time. I believe that the education that University of the Philippines provides is far more excellent than in Malaysia even if I have the chance to be sponsored by my employer.

In case the company officially recognizes the Data Scientist role, I may pursue PhD with UP, too.

RESEARCH OUTLINE:

Describe your research goal while in the graduate program. State the problem, motivation, and possible benefits once resolved.

The IT Service Management and Infrastructure Services of Computer Science Corporation have moved into a different service model in which most of the resources including the employees are leveraged to support different accounts / clients; this is the Next Generation Delivery Model.

Due to this change, the service levels have degraded and employee / client satisfaction dropped. Through this research, I can identify the painpoints, bottlenecks and problems by scientifically measuring metrics, comparing differences and looking for possible solutions that will benefit the company by avoiding penalties, improving client satisfaction and prescribing good decisions.
